

The Work Right Foundation

*Helping people in Africa work
right and stay healthy.*

The Need

- Small manufacturing and subsistence agricultural workers in Africa are in desperate need of basic tools to work safely and without inflicting wear and tear to the human body.
- These small yet vital employers lack funding to integrate the application of ergonomic principles into jobs which rely heavily on physical human labor.
- The field of ergonomics looks for ways to improve conditions so that the work can be done effectively and with less harm to the human body.

The Mission & Goal

- ↳ **OUR MISSION:** Reach out to US/Global companies to donate new or used ergonomically designed supplies for deployment in Africa.
- ↳ **OUR GOAL:** To collect 2,000 ergonomically effective supplies by June 15th, 2009 for distribution to African workers in need.
- ↳ **INSPIRATION:** By giving to those in need we can spread the benefits of ergonomics and know we can make a difference.

First Target Communities: Zimbabwe

↳ Life Expectancy in Zimbabwe: 45.77 years

Developed Countries Life Expectancy

- UK = 79.01 - Australia = 81.63
- China = 73.47 - Saudi Arabia = 76.3
- US = 78.11 - Germany = 79.26
- France = 80.98 - Cayman Islands = 80.44

↳ Government type: Parliamentary Democracy

↳ Difficult economic problems as it struggles with an unsustainable fiscal deficit, hyperinflation, and bare store shelves.

↳ Industries: mining, steel; wood products, cement, chemicals, fertilizer, clothing and footwear, foodstuffs, beverages

Three Ways to Help
